The South Tahoe Public Utility District (DISTRICT) invites sealed bids by electronic submission only for its purchase of butterfly and ball valves to be used in the 2020 Luther Pass Pump Station Improvements Project scheduled to be constructed during the 2020 construction season.

Electronic Bids will be received until **2 o'clock p.m. on March 10, 2020** at 1275 Meadow Crest Drive, South Lake Tahoe, California. These valves will be used on yard piping adjacent to a recycled water pump station owned and operated by the District. They will be installed by a Contractor as part of the 2020 Luther Pass Pump Station Improvements Project to be constructed during the summer of 2020. The valves will consist of twenty-four inch (24") and twelve inch (12") nominal diameter, Class 300 and Class 600 butterfly valves as well as a twelve inch (12") Class 300 ball valve. The butterfly valves will be installed in direct bury applications with flange connections to welded steel pipe. The majority of these valves will experience typical operating pressures of approximately 550 psi. This bid will include cast carbon steel valve bodies with an additive alternate option for stainless steel valve bodies.
